

Biting Garkrid Nest

This is a nest of vicious Biting Garkrid, with a few valuable looking eggs protruding from the branches.

The garkrid appear to have pulled some of the cargo into the nest. A model adjacent to the nest at the end of its main move may roll a dice to investigate. If a model sacrifices its entire movement then it may roll two die at the same time. On a 4 or more the model takes a Loot Token. On a 1 there is no more valuable loot in that pile and the cargo pile can be removed.

If any model starts its activation within 3" of the nest then cast 3 Combat Stones and place one Biting Garkrid adjacent to it for each failed roll. You may use combat abilities to recast these stones. One garkrid will attack immediately, with the other garkrid supporting.

Surprise!

As you approach the nest you hear a scream. Roll on the following table and place the relevant models adjacent to the most isolated player model on the table (this is the model furthest from any other friendly or enemy models – if it is unclear then roll a dice to decide). The models immediately attack. Once the attack is resolved, shuffle this card back in with the others and draw a replacement card for the nest.

Water Feature

Cost: 3 shenanigans tokens

Roll on the following table and place the relevant model in water on the board, at least 6" away from any player's Boat or Crew and at least 24" from the starting line.

Swimming creatures activate at the start of each Combat Phase. They Move Cautiously towards the closest Boat (excluding spectator boats), then attack a Boat if possible (always using all Erac). After a swimming creature's attack, roll as many Erac and as many Oran as there were successful attacks, and pivot the Boat as per the wind direction rules. Swimming creatures will leave the board if they damage a Boat (i.e. removes at least one Stamina), or if no Boat is in full movement range.

Sqwak!

A rather battered chest is set at the centre of this small clearing.

As you pick up the chest, it starts wiggling vigorously. The lid opens suddenly, and out pops a rather miffed Tourac. Sqwak! All models within 2 inches of the chest are Stunned by its deafening call.

Their troubles are far from over, as the call is answered by a nearby Utakrid. Place the Utakrid at least 6" away from any model.

The Utakrid activates at the start of each Combat Phase. It Moves Cautiously towards the closest Crew (excluding spectators), then attacks Crew if possible.

The Utakrid will always grab a Crew if possible. If it does not kill it immediately, it will drop it then leave the board. A model dropped on land needs to roll a Toughness save.

Tourac: Beast; M: 6", A: 1, S: 0, T: 5+, CR: 12", Sz: **tiny**; Untrained, Sqwak!

Abilities

Crunch (x) [C]: Cast an extra X Erac Combat Stones when attacking (as opposed to being attacked).

Dodge* [C]: Force your opponent to turn over one successful Erac.

Flying [T]: This model may move over *Enemy* models as long as it has sufficient movement. It may also move at full rate even if forced to *Move Cautiously*.

Grab [A]: Immediately after this model's Basic Movement, select one Small model that was contacted by this model during that movement. Place the model adjacent to this model.

Overflight [C]: This model can Move after its Combat Action.

Sqwak! [S]: If a blow is landed on this model, it screams at the top of its lungs: all *Beasts* within its Command Range (from closest to farthest) immediately move straight towards it, stopping if they come into base contact with another model. This ability can only be used once per Turn.

Untrained [T]: This model may not be Activated Directly.

Very Tough* [S]: Re-roll a failed Toughness save.
