

# Intelligence

A simple official scenario for 2 players, 200 to 410 points.

*NuraSen Tirrel clutched the vital message tube as he ran through the forest. His bodyguards were all dead, but the flutter of leathery wings had abated and he stilled hoped he might escape the accursed trees and deliver his message. This hope was short lived as a sharp screech erupted from the trees to his left and great shape leapt towards him.*

## Extra Miniatures

### Kedashi

- 2 x Kaopi
- 21 x Frenu
- 1 x Hendreek Kelahn

## Set Up

The encounter takes place on a small (3 x 3 feet) playing area in the Naralon forest, with one player using the Delgon and one the Empire. The table should have scattered patches of woodland. The Kelahn is placed at the centre of the table next to an objective marker to represent the dead priest.

The Delgon player deploys his models as a single group (deploy one model and then all other models within its Command Range) at least 18" from the dead priest. The Fubarnii player then deploys his models as a single group, opposite the Delgon and at least 18" from the dead priest. The players then each place one Kaopi accompanied by 10 frenu at least 12" from any other models.

## Victory Conditions

Both players wish to recover the information the Priest was carrying. The player who can carry the information from the table wins.

Either player will flee if more than half of their elite models are killed.

## Special Rules

Any non-Kedashi model that is engaging the dead priest at the start of its activation may take the information tube, which can be carried as an Object (see the Rules).

If a player is forced to flee then he removes all his models. The player who has fled then becomes the Kedashi Controller for

the remainder of the game. However, he no longer receives any reinforcements.

### Controlling the Kedashi Swarm:

- The Kedashi are treated as a separate force with their own set of 6 Initiative Counters. When the Kedashi counters are drawn the Kedashi Controller may choose to activate and move models using the normal rules, but may not choose to activate any Kedashi models engaged with their models. They may use the swarm manipulation ability on the Kaopi, placing any removed frenu to the side.
- Initially the Kedashi Controller is the player who has the Initiative when the stone is drawn, but the role will vary through the game. During the game every time a player kills a frenu he keeps the model.
- If a player has more frenu than their opponent then they become the Kedashi Controller. During the End Phase each player casts one stone for each frenu they have and must deploy one of their frenu for each success they cast. The frenu must be placed within the Command range of one of the Kaopi.
- If the Kedashi models are engaged with a player's models during the Combat Phase then the other player may choose to attack with them. They may use the model's abilities, but if they remove any frenu to gain Stamina then they are immediately given to the opposing player.
- If a Kaopi is killed then the player who killed it must immediately redeploy it anywhere on the table at least 12" from any Delgon or Empire models.
