

Eggs! (WoT Day 2022)

A simple official scenario for 2 or more players, 200 to 300 points.

The eggs of the kellanion akitiin are regarded throughout Anyaral as a delicacy and many brave adventurers will risk their lives to try and capture the delicious gooey orbs.

The adult akitiin are however very protective and will attack any who venture close to their nests, erupting from their underground tunnels and dragging unfortunate trespassers back to feed their subterranean offspring.

Extra Miniatures

Kedashi

1 x Kellanion Akitiin

8 x Akitiin Egg

Set Up

The encounter takes place on a small (3 x 3 feet) playing area with a few bits of scenery scattered around. Two eggs per player are placed near the centre of the board, at least 2" apart. An additional two eggs per player are placed near the table, along with one or two akitiin and the akitiin hatchlings (if you are using them).

The players draw Initiative Counters to deploy. When their Counter is drawn a player may place all their models as a single group (deploy one model and then all other models in the force within its Command Range) anywhere on the table at least 12" from any other models or eggs. Continue drawing Counters as normal and players who have deployed may activate or place akitiin even if other players haven't deployed yet.

Victory Conditions

The player who escapes with the most eggs at the end of the game is the winner! If several players have the same number then they are all winners! Play continues until all models have left the table. Players cannot be forced to flee.

Boons: The winning player gain one Boon, to be rolled on the Boons table before the final game (D6 then D6). Furthermore, each player will gain one Boon per 4 eggs they collected (rounding down) (D6 then D6).

Special Rules

Activation Counters: Each player gets four Initiative Counters rather than the usual six.

The Eggs: Eggs are treated as Objects. Each model may carry any number of eggs. Beasts may carry eggs, but drop them after moving.

The Akitiin: If there are any akitiin available off the board then any player may choose to deploy one of them in place of an activation. The akitiin may erupt anywhere on the board within 3" of an egg.

During the Combat Phase one player may use their turn to attack with the akitiin. It may lunge, but must attack a model carrying an egg if possible.

If the akitiin is hit by any blows, cast a Combat Stone instead of making a Toughness save. On a success the akitiin flees back into its tunnel and is removed from the table. Cast three Combat Stones and the player who landed the blows may place one egg for each success within the area previously occupied by the akitiin.

If there are no models within 3" of the akitiin at the end of the Combat Phase then it retreats, taking any nearby eggs from within 3" with it.

Escaping: Any model may escape if it ends its move at least 6" from any Enemy models. If it is more than 18" from the centre of the table then it automatically keeps all the eggs it is carrying. If closer than 18" then cast a Combat Stone for each egg: it is kept on a success, otherwise it is left on the table.
