Eradicate

An official scenario for 4 or more players, 600 to 710 points.

The hunters have located the Devanu tower and are closing in. The pack are out hunting, but a lone guard has stayed back in the nest with the brood of eggs, presenting an ideal opportunity to crush the brood.

Forces

Devanu

Pick two 300 points Devanu forces, and add the below extra models:

1 x Jenta Spear

4 x Devanu Eggstick

2 x Devanu Hatchling

non-Devanu

Pick two 300 points non-Devanu forces.

Set Up

The game is played on a medium (4 x 4 feet) playing area. Place a tree (or a small tower) at the centre of the board.

The Devanu players set up with a single Devanu Jenta on the tree, along with four Devanu Eggsticks and two Devanu Hatchlings. The rest of the Devanu pack is kept off the board.

The non-Devanu players may deploy their models anywhere on the board at least 12 inches from the Devanu tree.

The Devanu players may deploy one group of models (deploy one model and then all other models in the force within its Command Range) at least 12 inches from any Enemy models as an Activation. They may start activating their Devanu even if not all their models have been deployed, but all models must be deployed.

Victory Conditions

Devanu: If the Devanu can escape off the table with more than half their non-Beast Devanu models, including at least one Devanu Eggstick then the Devanu players win. Devanu models may not flee from the table until all the Devanu Eggsticks and Devanu Hatchlings are either dead or off the table.

Attackers: The attacking players gain one victory point for each Devanu or Devanu Eggstick they kill. Attacking players will individually flee if they lose more than half their Elites. If forced to flee, then they must give one of their victory points to each remaining player. If the attacking players manage to stop the Devanu players from winning then the player with the most victory points is the winner!

Special Rules

The Devanu are comfortably at home on their nest, but their Beasts and other models will be less confident.
Grishaks and cavalry (including KalMalog) are unable to climb the tower. Other models may move over the tower but must make an Agility Test unless they Move Cautiously.

Agility Test: D6 roll:
1: the model falls off the tower (make one Toughness save for each 6 inches (or part) they fall).
2: the model stops its movement immediately.
3+: The model moves as planned.
The test may be re-rolled if a model has Surefooted[T] or Agility[T].
